An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Blynn and Krisanne Shideler on January 13, 2004.

Change the title to: - WELDABLE COATING OF PHOSPHATED EPOXY POLYMER, CURING AGENT AND ELECTROCONDUCTIVE PIGMENT--.

Claims 5, 8 and 10, line 2, replace "comprising" with --consisting of--.

The following is an examiner's statement of reasons for allowance:

The motivation for employing the phosphoric acid-modified epoxy resin of Japanese Patent No. 7-331164 as the epoxy resin of the closest prior art of Berger et al. and Young, Jr. is a direct function of the amount of from 0.1 to about 20 weight percent (paragraph [0015]). There is no indication that the increase of the level of phosphoric acid-modified epoxy resin of the Japanese to within the proportion of Young, Jr. would impart the adhesive properties and moisture resistance.

The references cited in the attached Form PTO-892 completes the search for the non-elected species of epoxy polymer and curing agents. None of the cited prior art recites the claimed combination of phosphorus acid-epoxy polymer reaction product and curing agent within the claimed concentrations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."
